

Table of Contents

<u>March 1979</u>							
1	High-performance small beams	-	-	-	-	-	1
<u>May 1979</u>							
2	quads vs. yagis revisited	-	-	-	-	-	14
3	Broadband reflectometer and power meter	-	-	-	-	-	24
4	New approach to measuring SWR at high frequencies	-	-	-	-	-	29
5	Folded umbrella antenna	-	-	-	-	-	31
6	80-meter broadband antennas	-	-	-	-	-	37
7	Multiband antenna system	-	-	-	-	-	45
8	Homebrew 2-meter mobile antenna	-	-	-	-	-	49
9	Sloping antenna array for 80-meter DX	-	-	-	-	-	51
<u>July 1978</u>							
10	Short Beverage for 40 meters	-	-	-	-	-	54
<u>August 1979</u>							
11	Ground systems for vertical antennas	-	-	-	-	-	58
12	All about traps and trap antennas	-	-	-	-	-	61
<u>September 1979</u>							
13	Antenna design for omnidirectional repeater coverage	-	-	-	-	-	69
14	Vertical antenna for 40 and 75 meters	-	-	-	-	-	75
<u>December 1979</u>							
15	Log-periodic antenna design	-	-	-	-	-	79
<u>January 1980</u>							
16	Yagi antenna design: performance calculations	-	-	-	-	-	85
17	Log-periodic antennas for the high-frequency amateur bands	-	-	-	-	-	91
<u>February 1980</u>							
18	A new class of coaxial-line transformers	-	-	-	-	-	94
19	Yagi antenna design experiments confirm computer analysis	-	-	-	-	-	101
<u>March 1980</u>							
20	New class of coaxial-line transformers	-	-	-	-	-	110
21	Log-periodic fixed-wire beams for 75-meter DX	-	-	-	-	-	122
<u>April 1980</u>							
22	Log-periodic fixed-wire beams for 40 meters	-	-	-	-	-	128
<u>May 1980</u>							
23	Three-element quad for 15-20 meters which uses circular elements	-	-	-	-	-	133
24	Yagi antenna design: performance of multi-element simplistic beams	-	-	-	-	-	139
25	Notes on ground systems	-	-	-	-	-	148
26	Dual quad array for 2 meters	-	-	-	-	-	151
27	Automatic VSWR and power meter	-	-	-	-	-	155
28	Experimental high-gain phased array	-	-	-	-	-	165
29	10-meter ZL Special antenna	-	-	-	-	-	169
30	Big quad – Small yard	-	-	-	-	-	174
31	Earth anchors for guyed towers	-	-	-	-	-	177
<u>June 1980</u>							
32	Yagi antenna design: more data on the performance of multi-element simplistic beams-	-	-	-	-	-	179
33	Phased vertical antenna for 21 MHz	-	-	-	-	-	187
34	Antenna restrictions – Another solution	-	-	-	-	-	190
<u>July 1980</u>							
35	Open quad antenna	-	-	-	-	-	192
<u>August 1980</u>							
36	Base-loaded vertical antenna for 160 meters	-	-	-	-	-	195
<u>September 1980</u>							
37	Yagi antenna design: Quads and Quagis	-	-	-	-	-	197
<u>October 1980</u>							
38	Three-element switchable quad for 40 meters	-	-	-	-	-	206
39	A folded end-fire radiator	-	-	-	-	-	208
<u>November 1980</u>							
40	Super quad for 7-28 MHz	-	-	-	-	-	212
41	Yagi antenna design: stacking	-	-	-	-	-	218
